

# How to Get More Cards and Help Creating Your Decks

Thank you so much for downloading your free cards. You can see we've included:

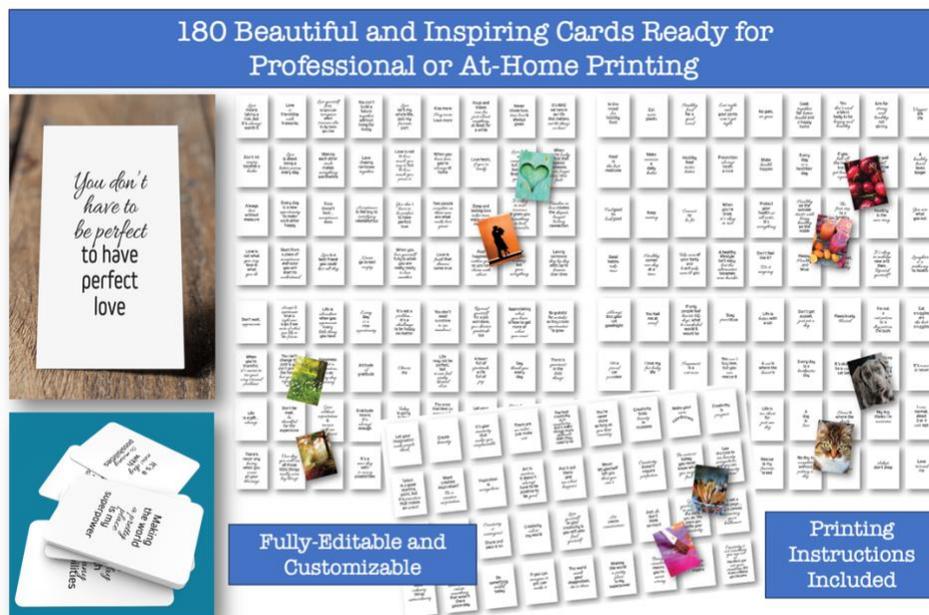

- A PSD file for editing. It includes the guide lines (yellow is the no print area and green is the blur area and may not print), plus crop marks. If you don't need these, you can turn these layers off in Photoshop or Photopea.
- A PNG file that is ready for publishing

We've also thrown in a couple of backsides you can use for your cards, but you can create your own by inserting your own images or text into the PSD file.
